

A Whitening Alternative

Hello BriteSmile™!

*There are dozens
of places in
Columbus to get a
great cup of coffee
or espresso, but
only a few places
to easily, effectively
remove the effects*

Professional-grade teeth whitening has typically required using both trays and a whitening gel over a several week period. Although this method continues to yield great results, you now have a less-demanding whitening option to obtain brighter teeth.

BriteSmile™ is the most advanced teeth whitening method available today. It provides a brighter shade to teeth, and does not require you to use whitening trays to maintain the full effect of the treatment.

Capitol Square Dental is one of only a few dentists in Columbus certified to perform BriteSmile™ whitening treatments.

Here's how it works.

1. Talk with Dr. Angart about the personal and professional benefits of having whiter teeth.
2. Schedule a BriteSmile treatment at a convenient time for you; the procedure lasts one-and-a-half to two hours.
3. Enjoy your favorite DVD or video while Dr. Angart performs the BriteSmile treatment.
4. Have Dr. Angart assess the results of your treatment several days after having the procedure performed.

5. Use the specially developed toothpaste you are given at your appointment twice a day in lieu of your normal toothpaste.
6. Show off your great smile to everyone you meet.

Every BriteSmile™ procedure comes with a 90 day money-back guarantee, or you may choose to be re-treated within the first 90 days until you are completely satisfied. After 90 days, you can receive up to two more BriteSmile treatments within two years at only half the current fee.

To find out more about the BriteSmile™ teeth whitening system, call the downtown office (461-4600) for a brochure, talk with Dr. Angart about it on your next visit, or check out the BriteSmile web site at www.britesmile.com. ●
